

**Acta Virologica** is an international journal of predominantly molecular and cellular virology. It provides means for rapid publication of original papers dealing with fundamental research mainly on human, animal and plant viruses. As a matter of tradition also rickettsiae are included.

Areas of interest are structure, genetics and morphology of viruses, molecular biology of virus-cell interactions, pathogenesis of viral diseases, viral immunology, vaccines, antiviral drugs and viral diagnostics. Original experimental papers may have the form of full-length articles, short communications or letters to the editor. Besides them also review articles, book reviews, announcements and reports on various scientific events are accepted.
